

Prior learning

- Transient art is the creative experience of placing open-ended resources together on a surface. Children will experiment with natural resources to create their moveable art designs.
- Nature provides us with wonderful materials to make art with, due to the range of stunning colours, textures, shapes and patterns.
- Use materials that are abundant or already on the ground - **if in doubt, leave it out!**

Key knowledge I need to understand

- Look at transient artists and famous art examples.
- Explore in finer detail different shape, space, pattern, positioning, colour, texture and overlapping.

Activities/topic links

- Foraging
- Bonfire Night and Diwali
- Self-portraits
- Animal/plant portraits
- Season wheel
- Storyboards
- Campfire lays
- Rainforest layers
- Our skeleton/body
