

Seamer and Irton CP School Parent / Carer Acceptable Use Policy

New technologies have become integral to the lives of children and young people in today's society, both within schools and in their lives outside school. Technologies open up new learning opportunities for everyone. They can stimulate discussion, promote creativity and effective learning, and promote more effective communications between parents / carers and the school in order to support young people with their learning. Young people should have an entitlement to safe internet access. This Acceptable Use Policy is intended to ensure:

- All young people will be responsible users and stay safe while using the internet and other communications technologies for educational, personal and recreational use.
- School Computing/ICT systems and users are protected from accidental or deliberate misuse that could put the security of the systems and users at risk.
- Parents and carers are aware of the importance of e-safety and are involved in the education and guidance of young people with regard to their on-line behavior.

The school will try to ensure that pupils have good access to Computing/ICT to enhance their learning and will, in return, expect the pupils to agree to be responsible users. A copy of the Pupil Acceptable Use Policy is available on the school website so that parents / carers are aware of the school expectations of the young people in their care.

Use of Digital / Video Images

The use of digital video and images play an important part in learning activities. Pupils and members of staff may use school devices to record evidence of learning and activities. These images may then be used in presentations in subsequent lessons or to celebrate success through their publication in newsletters, on the school website, school twitter account and occasionally in the public media. The school will comply with the General Data Protection Regulations and request parents / carers permission before taking images of members of the school. We will also ensure that when images are published the young people cannot be identified by the use of their full names.

At Seamer and Irton CP School we are happy for parents and carers to take photos and video of events for **personal use**. We would like to remind parents that Photographs can be considered personal data under the General Data Protection Regulations. Parents should only film/photograph their own child/children. However, in reality, we acknowledge that other children are likely to appear in the background. We request that these images are not distributed or put online eg. Facebook, Youtube or other social media/image sharing platforms. This is to protect all members of the community.

We must ensure that we protect and safeguard all children and staff, including those who do not want to have their images stored online, whether for legal reasons, as part of a child protection order, or other personal circumstances (even if they are in the background of a photo or video of your own child).

Parents are not permitted to take photographs or to make a video recording for anything other than their own personal use.

- Once posted and shared online any image or video can be copied and will stay online forever.
- Some children are at risk and **must not** have their image put online.
- Some people do not want their images online for personal, religious or legal reasons.
- Some children and staff may have a complex family background which means that sharing their image online can have **unforeseen consequences**.

We must ensure that we protect and safeguard all children and staff

The Home/School Agreement

As a parent / carer, I give permission for my son / daughter to have access to the internet and Computing/ICT systems at school. I know that my son / daughter has signed an Acceptable Use Policy (AUP) and will receive a computing education with online safety embedded within it to help them understand the importance of the safe use of Computing/ICT – both in and out of school.

- I understand that the school will take every reasonable precaution, including monitoring and filtering systems, to ensure that young people will be safe when they use the internet and Computing/ICT systems.
- I understand that my son's / daughter's activity on the Computing/ICT systems will be monitored and that the school will contact me if they have concerns about any possible breaches of the AUP.
- I agree to the school taking and using digital / video images of my child / children. I understand that the images will only be used to support learning activities or in publicity that reasonably celebrates success and promotes the work of the school.
- I agree that if I take digital or video images at, or of, school events which include images of children, other than my own, I will not make these images accessible to any 3rd party through, for example, YouTube or social media sites.
- I agree to model good online practice. When using social media, I will refrain from writing comments which are derogatory towards the school, its staff and pupils or any other aspects of Seamer and Irton CP School. If I am unhappy with any aspect of Seamer and Irton CP School, I will discuss it with a member of staff or the headteacher.

Home Use of the Internet

We hope you will reinforce the issues contained in the Pupil Acceptable Use Policy when your child uses the internet at home. In order to do this we recommend that you:

- Ensure that children access the internet in a communal room and that there is appropriate supervision for the age of your child (including supervising all internet use by younger users).
- Set appropriate rules for using the Computing/ICT and the internet safely at home. The school rules could provide a starting point.
- Inform the school of any concerns that the school could help to address through teaching.
- Ask your child about the sites they are visiting.
- Ensure that family computers are password protected and have robust anti-virus software which is regularly updated.
- Ensure content is appropriately filtered for younger users.
- Ensure that your child knows that any protection system does not stop all unsafe content and that they need to tell you if they access something inappropriate or get an upsetting message.
- Reassure your child that if they talk to you about a problem they are having on the internet, you will not ban them from using it as this will discourage them from telling you.
- Ensure that your child knows not to leave computers logged on with their username or logged on to sites with personal details entered as others could use them.

Additional Guidance on Safe Use of Computing/ICT at Home Keeping Safe

- Discuss usernames with children and talk about how to choose them carefully to protect their identity.
- Talk to young people about the information they should keep private in order to prevent them being contacted or traced including full name, address, telephone no, school, places they do regularly.
- Talk to young people about the need to limit access to their own information by using the safety and privacy features of sites to only give access to people they know and being careful who they add as friends.
- Model safe behaviour in your use of Computing/ICT.

Research and Fun on the internet

- Talk to your child about the fact that any information published on the web can be read by anyone and that they should only publish information they would be happy for anyone to read.
- Check information that younger users are publishing on the web before it is posted to ensure that they are not putting themselves at risk.
- Check that they are old enough for the sites they are using.

Communicating

- Discuss the need for young people to be polite to others online and that they should not use bad language or comments which might upset others.
- Discuss the fact that e-mails / messages can be intercepted and forwarded on to anyone (including parents, head teacher or future employer!).
- Ensure that young people know they should not open messages if the subject field contains anything offensive or if they do not recognise who it is from and that the safest thing to do is to delete it without opening it.
- Recognise that there is a difference between online friends who you will never meet and real world friends. Talk to your child about their online friends.
- Remind your child that people they talk to online may not be who they seem.

Sharing

- Ensure your child knows that downloading games and music that is copyrighted without paying for it is illegal

Buying and Selling Online

- Help young people to tell the difference between web sites for information and web sites selling things.
- Discuss how to recognise commercial uses of the internet e.g. I Tunes, mobile phone downloads, shopping.
- Remind young people that if an offer looks too good to be true it probably is and that they should not respond to unsolicited online offers.
- Remind young people that they should not purchase or download anything that costs money without asking permission and that they should not use someone else's identity to buy things online.

Problems

- Ensure that they know that if they receive an offensive or worrying message / e-mail they should not reply but should save it and tell you.
